1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by McNeely (U.S. Pat. No. 4,302,175).

McNeely discloses an apparatus for molding disc structures. The apparatus comprises a mold (12) and a stamper (28) for forming the indica information on the disc being molded (see cl. 1, ll. 46-54). A stamper holder (40) is provided fitted in an insertion hole in the central portion of the stamper (see Fig. 1). The stamper holder is formed to have an outer periphery (46) increased in diameter on a side toward the molding surface compared with a reverse side thereof to form a sloped surface (48). As such, part of the outer peripheral sloped surface (48) of the stamper holder has a shape complementary to the opposed inner peripheral surface (34) of the stamper. McNeely further discloses the stamper holder to be formed as such that an end face of the stamper holder on the cavity side is flush with the molding surface (see Fig. 1).
